BTech Pre-Final Year Computer Science Engineering
KL University

EDUCATION

- KL University, Vijayawada** 2023-2027
BTech Computer Science Engineering with Specialization CyberSecurity and Blockchain Technology CGPA : 9.15

RELEVANT COURSEWORK & LEARNING

- Cyfrin Updraft - Web3 & Solidity Development** Jan 2025 - Present
- Blockchain Technology Specialization - KL University** 2023-2027

TECHNICAL SKILLS AND INTERESTS

Programming Languages: C, C++, JavaScript, Java, Python, Solidity
Tools & Environments: Linux, Git, NPM, Hardhat, Foundry
Tech Stack: React.js, Django, Node.js, Express.js, Web3.js, Ethers.js
Databases & Cloud Services: MySQL, MongoDB, PostgreSQL
Blockchain Technologies: Ethereum, Smart Contracts, DeFi, NFTs

EXPERIENCE

- Job Portal for College – Full Stack Developer** Jan'25 – May'25
 - Developed a college job portal to connect students with recruiters and streamline the placement process.
 - Implemented **secure authentication and role-based access control** for students, recruiters, and admins.
 - Designed a **responsive interface with React and Tailwind CSS** for job postings, applications, and tracking.
 - Integrated a **backend with Node.js and MongoDB** to manage job listings, applications, and student profiles.

PERSONAL PROJECTS

- Blockchain Learning Projects** Jan 2025 - Present
Currently learning Web3 development and Solidity through Cyfrin Updraft curriculum
 - Learning smart contract development with Solidity and deployment on Ethereum blockchain
 - Studying DeFi protocols, NFTs, and blockchain fundamentals through hands-on projects
 - Tools & technologies: Solidity, Hardhat, Foundry, Web3.js, Ethers.js
- GoVroom: Car Rental System**
Developed a comprehensive car rental platform enabling users to browse, book, and manage vehicle rentals with real-time availability.
 - Tools & technologies used: React, Node.js, MongoDB
 - Implemented features for vehicle search, booking management, user authentication, and payment processing.
 - Deployed on Netlify: go-vroom.netlify.app
- Ecommerce Website** Aug 2024
Developed a web application that compares product prices from Amazon and Flipkart.
 - Tools & technologies used: React, Node.js
 - Optimized performance for accurate and fast price comparisons.
- Foodio: Online Food Ordering System** Nov 2024
*Developed **Foodio**, an online food ordering system using **Python**, real-time order tracking.*
 - Tools & technologies used: Python, Django
 - Implemented key features like restaurant listings, menu browsing, cart management, and order tracking.

ACHIEVEMENTS

- Cyfrin Updraft - Web3 & Solidity Development** Jan 2025 - Present
- Microsoft Azure Fundamentals** June 2025
- Microsoft Azure AI Fundamentals** June 2025
- Salesforce Certified AI Associate** Nov 2024
- Linguaskill - Cambridge University Press & Assessment** Aug 2024

ACADEMIC AND EXTRACURRICULAR ACHIEVEMENTS

- Consistently maintained a strong academic record in Computer Science Engineering.
- Participated in coding competitions and hackathons.
